

Deko Wood 1,2 mm

Single-wall chimney, matt black enamel, 1,2 mm thick, with aesthetic connections

★ Benefits

Resistance

Because of its inner and outer vitrified material, the Deko Wood 1,2 mm range guarantees colour stability and resistance to high temperatures and condensation

Aesthetics

The quality of the finish of the Deko WOOD 1,2 mm range makes it possible to maintain the aesthetics of an exposed connection and to integrate it perfectly

Cuttable

The flue can be cut, so long as the male end of the piece is always conserved. To cut use a fine grain cutting disk and then apply Dinak heat-resistant paint to the cut surface
